
Metric 4 -- leader hand-off timing across 30 seeds (n=10)
each dot = one real hand-off event in one run; each row = one seed
plain_seed123 (unclamped) -- real hand-offs per run: median=27, range [5, 37]
plain_seed123 (clamped, hardware-safe) -- real hand-offs per run: median=10, range [1, 25]
LJ baseline (Table 3, rule-based) -- real hand-offs per run: median=4, range [0, 11]
