
Metric 4 -- leader hand-off timing across 30 seeds (n=7)
each dot = one real hand-off event in one run; each row = one seed
plain_seed123 (unclamped) -- real hand-offs per run: median=24, range [9, 35]
plain_seed123 (clamped, hardware-safe) -- real hand-offs per run: median=10, range [3, 25]
LJ baseline (Table 3, rule-based) -- real hand-offs per run: median=8, range [0, 29]
